RPII Annual Inspector (No. 1056A)

Barrow Village Play Area

Date: 30/10/2020

Weather: Overcast

Time: 14:06

General Site Comments

The site is in a clean and tidy condition. There have been no real changes to the site since last month's annual inspection. There are still some remedial works required, mainly to the paintwork, hand grips, rope elements across the site and the removal of weed/moss growth.

Ancillary/Environmental items

Risk Assessment

Assessment of risk has been calculated using the two main criteria within the play industry:-

Severity of Injury

This comprises a severity rating based on the knowledge of play area injuries:

Little or no injury	0-1
Minor injury (requiring medical attention)	1-2
Major injury (absence from work or school)	2-3
Serious injury or long term sickness	3-4
Death or major disability	4-5

Likelihood of Injury

This calculation is based on the available accident data in relation to the numeric number of accidents for items of equipment or areas of the play area:

1	Low risk
2	Low-medium risk
3	Medium risk
4	Medium-high risk
5	High risk

Assessment of Risk

Multiply the severity by the likelihood of injury to obtain the risk:

Injury severity rating x probability of injury = risk

Additional scores may be added and the risk increased if, in the inspectors opinion, an element of the equipment, surfacing or surrounding area presents a risk to the user, i.e.: a trip point.

The Inspector

The scores are at the discretion of the assessor. The assessment and scores can vary due to a number of factors:

Weather, damage, nature of use, clothing, footwear, usage, positioning of site/equipment.

It is not the perfect system but if used by a competent assessor, it should offer improved safety and a reduction in hazards in a play area.

Outcomes

The risk assessment should be read in conjunction with annual, post-installation or audit reports.

Action should be taken to achieve risk levels of low or low/medium.

<u>Risk Score</u>	<u>Risk Categories</u>
1-3	Very Low Risk (Monitor)
4-7	Low Risk (Monitor and take reasonable action if required)
8-12	Medium Risk (Take action to reduce if possible or available)

13-20

High Risk (Take action immediately and assess control measures)

21+

Unacceptable Risk (Remove or immobilise before taking immediate action and assessment of control measures)

Design, location and physical site factors may determine the overall risk of the site. These may be difficult to economically change.

Ancillary Items and Environmental/Other Hazards

<u>Ancillary Item</u>	<u>Risk Score (Severity x Probability)</u>	<u>Comment</u>	<u>Action or Control</u>
Access/Pathways	1 x 2 = 2 (Very Low)		See Report
Seating/Picnic Tables	1 x 2 = 2 (Very Low)		See Report
Teen Shelter	3 x 2 = 6 (Low)		See Report
Litter Bins	1 x 2 = 2 (Very Low)		See Report
Access Gate	2 x 2 = 4 (Low)		See Report
Ownership/Information Signs	1 x 2 = 2 (Very Low)		See Report
General Surfacing - Grass	1 x 2 = 2 (Very Low)		See Report
Cleanliness	1 x 2 = 2 (Very Low)		See Report

Equipment

<u>No.</u>	<u>Equipment Item</u>	<u>Surfacing</u>	<u>Risk Score (Severity x Probability)</u>	<u>Action, Control or Comment</u>
1	Horse Spring Rocker	Grass	2 x 2 = 4 (Low)	See Report
2	Playzone Multi-Play Unit	Grass Mats	3 x 2 = 6 (Low)	See Report
3	Swing (Flat)	Grass Mats	3 x 2 = 6 (Low)	See Report
4	Swing (Cradle)	Grass Mats	3 x 2 = 6 (Low)	See Report
5	Stepping Pods	Grass	3 x 2 = 6 (Low)	See Report
6	Basketball Post	Bitmac	2 x 2 = 4 (Low)	See Report
7	Group Swing	Grass Mats	3 x 2 = 6 (Low)	See Report
8	Low Rotator	Grass Mats	2 x 2 = 4 (Low)	See Report
9	Rocking Horse	Grass Mats	3 x 2 = 6 (Low)	See Report
10	Toddlerzone Multi-Play Unit	Grass Mats	3 x 2 = 6 (Low)	See Report
11	Seesaw	Tiles	2 x 2 = 4 (Low)	See Report

The assessed LEVEL OF RISK for the play area is LOW.
